

## **Wonderful Advocates**

**Kevin & Tammy Williams**

Dear Mrs. Estelle,

We would like to personally thank you and your staff for having such a key roll in preparing our daughter Jessica Williams for high school, life.

Jessica is a straight A student excelling in math (algebra) and science (chemistry). Jessica was asked to tutor one of the 10th grade students struggling with algebra, the student is doing well now. During one of the meetings at teacher parent conference, the history teacher told us that Jessica should have been teaching the religion part of the class. We took the opportunity to meet with all of her teachers and received nothing but positive remarks from each and every one of them.

Jessica really enjoys band, this has helped her with finding new friends. During the first round of chairing Jessica landed third chair out of twelve for the flutes.

Jessica has become a wonderful, kind and caring young lady. Again thank you very much for being such wonderful advocates not only in preparing Jessica for high school but preparing her for life as a Catholic.

Sincerely,  
Kevin & Tammy Williams
